Three weeks (21 days) prior to your surgery date, DO NOT take any ASPIRIN, ANY OTHER MEDICATION CONTAINING ASPIRIN, or ANY ANTI-INFLAMMATORY MEDICATION. Aspirin and anti-inflammatory medications cause an abnormality of blood clotting. This effect may cause excessive bleeding at the time of surgery. TYLENOL may be used for pain. For any questions, contact your family doctor or call our office. Listed below are some drugs that are anti-inflammatory agents or contain aspirin.

## MEDICATIONS THAT SHOULD NOT BE TAKEN THREE WEEKS PRIOR TO SURGERY AND TWO WEEKS AFTER SURGERY:
